

Table B1A – Minimum FTD Requirements						
Entry Number	General FTD Requirements	QPS REQUIREMENTS				
		FTD Level				
		4	5	6	7	Notes
	is in motion.					
	An SOC is required.					
6.q.	The FTD must provide operational visual scenes that portray physical relationships known to cause landing illusions to pilots.					For example: short runways, landing approaches over water, uphill or downhill runways, rising terrain on the approach path, unique topographic features.
6.r.	The FTD must provide special weather representations of light, medium, and heavy precipitation near a thunderstorm on takeoff and during approach and landing. Representations need only be presented at and below an altitude of 2,000 ft. (610 m) above the airport surface and within 10 miles (16 km) of the airport.				X	
6.s.	The FTD must present visual scenes of wet and snow-covered runways, including runway lighting reflections for wet conditions, partially obscured lights for snow conditions, or suitable alternative effects.				X	
6.t.	The FTD must present realistic color and directionality of all airport lighting.				X	
6.u.	The following weather effects as observed on the visual system must be simulated and respective instructor controls provided. (1) Multiple cloud layers with adjustable bases, tops, sky coverage and scud effect; (2) Storm cells activation and/or deactivation; (3) Visibility and runway visual range (RVR), including fog and patchy fog effect; (4) Effects on ownship external lighting;				X	Scud effects are low, detached, and irregular clouds below a defined cloud layer.
